
Tunniste/teema:	4.01
Projektin nimi:	COFRET: Carbon Footprint of Freight Transport
Vastuutaho/vastuuhenkilö:	VTT/ Kari Mäkelä & Heidi Auvinen
Yhteistyöosapuolet:	Projektikonsortio: DLR (koordinaattori), CERTH-HIT, IFSTTAR, ITSW, Marlo, NEA, PTV, RAPP, TNO, TOI, TTR, TUDO, VGTU VTT:n yrityskumppani case-tutkimuskohteena: UPM
Liitynnät (ml. ohjelmat):	EU FP7
Aikataulu:	01.06.2011 - 31.05.2014
Budjetti:	299 211 €
Rahoittajat:	Yhteisrahoitteinen, EU FP7
Päivitys:	03.02.2014
Kommentit:	Projektin www-sivu: http://www.cofret-project.eu/

Tiivistelmä

The COFRET project reviews existing methodologies for the calculation of the carbon footprint along the full supply chain and recommends further steps towards harmonization of the carbon footprint calculation. COFRET draws upon existing initiatives and projects already being developed by different stakeholders in the supply chain. This is supplemented through a stakeholder consultation and a gap analysis. The review of the methodologies is supported by stakeholders in real supply chain situations by means of case studies. VTT was the leader of WP 2: *User needs and existing methods and tools for calculation of carbon footprint* (June 2011 - March 2012), and VTT carries out a case study together with UPM in the on-going WP 5.
